Meeting Coordinator:	LGL, SU-HSMTC	Document date:	22/09/2023
Registration link	https://forms.gle/tacPsRArmCEMDgYb9		

Objectives of 3rd JADECARE Stakeholder Forum

JADECARE (Joint Action on implementation of Digitally Enabled integrated person-centred **CARE**) will contribute to innovative, efficient and sustainable health systems through providing expertise to assist European countries in undertaking health system reforms. It will enable national authorities to benefit from efficient solutions in digitally enabled integrated person-centred care. The main objectives are to reinforce the capacity of health authorities to successfully address important aspects of health system transformation, in particular the transition to digitally-enabled, integrated, person-centred care and to support best practice transfer from systems of “early adopters” to the ones of the “next adopters”. This Joint action involves the Competent Authorities of 16 Member States and 29 Affiliated Entities.

The Stakeholder Forums of JADECARE are intended to facilitate the exchange of experience and productive networking between the organizations participating in JADECARE and relevant Stakeholders.

To this mean, external Stakeholders, including health system representatives, researchers and academia interested in collaborating with the JA are encouraged to discuss the current status and achievements of JADECARE, emerging problems, but also further ideas, solutions and networking possibilities. Also, key health care industries/developers are invited to contribute on how to enhance competitiveness and economic growth opportunities of EU industry.

The Topic of this years’ virtual JADECARE Stakeholder Forum is:

“Digitally enabled integrated person-centred care – Sustainability of implementations“

This years’ Stakeholder Forum objectives are to:

- present the experiences, learnings and achievements of JADECARE and share the Sustainability plans of Next Adopter implementers to maintain and further develop their local good practices of digitally-enabled person-centred care
- discuss Stakeholder involvement and needs to make digital solutions sustainable that are supporting integrated patient-centred care pathways, in order to make them an everyday reality in their systems
- discuss challenges and new developments in Europe for integrated value health and social care services and how they can be supported by digital solutions

JADECARE original Good Practices (oGP):

- Basque Health Strategy in Ageing and Chronicity: Integrated Care (Basque Country)
- Catalan open innovation hub on ICT-supported integrated care services for chronic patients (Catalonia)
- The OptiMedis Model of Population-based integrated care (Germany)
- Digital roadmap towards an integrated health care sector (Region South Denmark, RSD)

AGENDA of 3rd JADECARE Stakeholder Forum

Agenda Items	Time		
Arrival on-site Experts, Registration	12:00-13:00
